

Consumable Products

As a full-service supplier of flux injection and rotary degassing systems to the molten aluminum processing industry, Wedron Flux offers a complete line of graphite rotors and shafts, ceramic-coated lances and fluxes.

30 1/2" SHAFT
PART #3137A

8" SQUARE X 1 1/2" ROTOR
PART #8827T

SHAFTS AND ROTORS

- ▷ All shafts and rotors feature specialized cut and machined graphite construction for longer service
- ▷ Graphite shafts are boron nitrate wrapped for extended life and available in 18, 24 and 31-inch lengths
- ▷ Graphite rotors are specifically designed for optimum shearing action and available in 6, 8 or 10-inch widths
- ▷ Engineered to the strictest tolerances and manufactured under strict quality control standards for proper product conformance
- ▷ Graphite is composed of a special particle size and impregnated to reduce oxidation
- ▷ Foam packaging
- ▷ Other machined graphite components available upon request

CERAMIC-COATED LANCES

- ▷ Lances available in 24, 26, 48-inch and 10 1/2-foot lengths
- ▷ Interior and exterior coating increases lance life

FLUXES

- ▷ Manual-grade and injection-grade fluxes designed for cleaning and degassing all aluminum alloys
- ▷ Ecoflux™ line of quality fluxes is manufactured with low or no fluoride and exhibits no smoke or odor
- ▷ Sodium and calcium-free fluxes available
- ▷ Made from the highest pharmaceutical and food-grade chemicals
- ▷ Available to meet all melting temperature requirements
