

Eco-Flux™

CUT YOUR FLOURIDE EMISSIONS BY UP TO 100%!

Introducing revolutionary Ecoflux™ products from Wedron Flux.

Eco-Flux low-flouride and no-flouride high performance fluxes can solve your emission problems. Manual Grade and Injection Grade fluxes available.

When you need to lower or eliminate flouride emissions, Ecoflux™ is the clear choice. Wedron Flux Ecoflux™ is designed to give a balanced reaction within the dross, resulting in the minimum exothermic reaction necessary to initiate the separation of the metal from the dross.

With Ecoflux™ products, you get all the performance advantages of Wedron Flux.

At Wedron Flux, we are pioneers in the development of systems and products that help improve nonferrous melt quality. As the turnkey source for both equipment and flux materials, we are able to offer unique, application-oriented systems, products and services tailored to your specific needs.

**EXCELLENT QUALITY CASTINGS
OPTIMUM OXIDE REMOVAL
SUPERIOR FURNACE CLEANING
LOW METALLIC CONTENT OF DROSS**
